

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

-
- 1 Claim 1 (currently amended). An information distribution system
2 comprising:
3 a plurality of information distribution units;
4 a server selecting at least one information distribution unit from
5 among said plurality of information distribution units, and transmitting
6 first information to said selected information distribution unit; and
7 a mobile terminal, and
8 wherein said selected information distribution unit includes:
9 a transmitting unit **electronically** transmitting to said mobile
10 terminal said first information received from said server such that said
11 mobile terminal is able to display said first information, said transmitting
12 unit transmits said first information to the mobile terminal through radio
13 communication, and the mobile terminal receives the first information
14 when entering a communication area of the selected information
15 distribution unit, and
16 a display unit visually displaying second information.
- 17 
1 Claim 2 (Original) The information distribution system according to claim
2 1, wherein said second information is related to said first information.
- 1 Claim 3 (Original) The information distribution system according to claim
2 1, wherein said first information is transmitted from said transmitting unit
3 to said mobile terminal by radio communication.
- 1 Claim 4 (Original) The information distribution system according to claim
2 1, wherein said first information is transmitted from said transmitting unit
3 to said mobile terminal by communication through wire.

1 Claim 5 (Original) The information distribution system according to
2 claim1, further comprising an electric shielding and said first information
3 is transmitted from said transmitting unit to said mobile terminal in said
4 electronic shielding.

1 Claim 6 (Currently Amended) The information distribution system
2 according to claim 1, wherein said first information is transmitted from
3 said selected information distribution unit to said server said server to said
4 selected information distribution unit through the Internet.

1 Claim 7 (Original) The information distribution system according to claim
2 1, wherein said mobile terminal includes another display unit displaying
3 said first information.

APZ
1 Claim 8 (Original) The information distribution system according to claim
2 1, wherein said selected information distribution unit further includes a
3 state indicator visually indicating whether or not said transmitting unit is
4 transmitting said first information.

1 Claim 9 (Original) The information distribution system according to claim
2 1, wherein said mobile terminal includes another state indicator visually
3 indicating whether or not said mobile terminal is receiving said first
4 information.

1 Claim 10 (Original) The information distribution system according to
2 claim 1, wherein said second information includes a visual advertisement ,
3 and
4 said first information includes what is related to said visual
5 advertisement.

1 Claim 11 (Original) The information distribution system according to
2 claim 1, wherein said second information includes a timetable of vehicles

3 and said first information includes third information indicative of said
4 timetable.

1 Claim 12 (Original) The information distribution system according to
2 claim 1, wherein said plurality of information distribution units are
3 installed in a shop and said first information includes fourth information
4 on an item displayed in said shop.

1 Claim 13 (Original) The information distribution system according to
2 claim 1, wherein said plurality of information distribution units are
3 installed in a museum and said first information includes fifth information
4 on an exhibition displayed in said museum.

1 Claim 14 (Original) The information distribution system according to
2 claim 1, wherein said plurality of information distribution units are
3 installed in a zoo and said first information includes sixth information on
4 an exhibition displayed in said zoo.
AZ
2

1 Claim 15 (Original) The information distribution system according to
2 claim 1, wherein said mobile terminal sends a request for said first
3 information, and said transmitting unit transmits said first information in
4 response to said request.

1 Claim 16 (Original) The information distribution system according to
2 claim 1, further comprising an information input computer for operation by
3 an information distributor, wherein said first information is inputted to said
4 information input computer, and
5 said information input computer sends said first information to said
6 server.

1 Claim 17 (Original) The information distribution system according to
2 claim 16, wherein said mobile terminal sends a user response to said

3 information input computer.

1 Claim 18 (Original) The information distribution system according to
2 claim 17, wherein said first information includes a questionnaire and said
3 user response includes an answer for said questionnaire.

1 Claim 19 (Original) The information distribution system according to
2 claim 17, wherein said user response includes profile data indicative of a
3 profile of a user of said mobile terminal.

1 Claim 20 (Original) The information distribution system according to
2 claim 17, wherein said user response includes a user identifier for
3 identifying a user of said mobile terminal.

AJ

1 Claim 21 (Currently Amended) The information distribution system
2 according to claim 16, further includes a profile-managing computer,
3 wherein said mobile terminal sends another request to said ~~identifier-~~
4 ~~managing profile-managing~~ computer, and said profile- managing
5 computer sends profile of a user of said mobile terminal in response to said
6 another request.

1 Claim 22 (currently amended) An information distribution unit
2 comprising:

3 a transmitting unit ~~electrically~~ transmitting a first information to a
4 mobile station through radio communication, wherein the mobile station
5 receives the first information when entering a communication areas of the
6 transmitting unit; and

7 a display unit visually displaying second information related to said
8 first information.

1 Claim 23 (Original) The information distribution unit according to claim
2 22, wherein said transmitting unit transmitting said first information to

3 said mobile station by radio communication.

1 Claim 24 (currently amended) A method of distributing information
2 comprising:

3 selecting a least one information distribution unit from a plurality
4 of information distribution units;

5 transmitting first information to said selected information
6 distribution unit;

7 electrically transmitting to a mobile terminal said first information
8 by said selected information distribution unit, wherein said transmitting
9 step is performed through radio communication and the mobile terminal
10 receives the first information when entering a communication area of said
11 selected information distribution unit; and

12 visually displaying second information by said selected information
13 distribution unit.

1 Claim 25 (Original) The method of distributing information according to
2 claim 24, wherein said second information is related to said first
3 information.
